### PROJECT

- **FULL STACK [E-COMMERCE WEBSITE]**  
To design and develop a responsive e-commerce website using React.js in Visual Studio Code, delivering a user-friendly interface akin to Home Depot's product showcase. My objective is to create an engaging and accessible online shopping experience by implementing responsive design principles, allowing seamless navigation across various devices.
- **QR CODE GENERATOR [ FLUTTER ]**  
Flutter App Development offers tremendous opportunities both for the development team and the business
- **AI BASED SMART VOTING SYSTEM**  
As the front-end developer for an AI-based Online Voting System, my objective is to design and implement key components, including candidate registration, user registration, and login pages using React.js. Focused on creating an intuitive and secure login experience, my goal is to contribute to the seamless functionality of the Online Voting System, ensuring a user-friendly interface for candidates, and Voters
